MDF RAFFLE**

**EMA Fall Meeting
at the NACS Show**

Energy Marketers of America established the Marketers Defense Fund (MDF) to assure that the industry's best interests are represented on the legislative and regulatory front. This fund has already effectively defeated regulatory initiatives such as proposed requirements to place the point of compliance for fuel quality at the retailer, force a 10-micron diesel filter mandate as well as a costly wetlines retrofit and automatic temperature compensation (ATC) at retail.

Other uses of the fund include:

- Conducting a diesel fuel additive corrosion study.
- Hiring a technical consultant staff to represent the Energy Marketers of America at several regulatory agencies.
- Working to approve a low liquid level integrity test as an alternative method

for containment sump testing that is required under the 2015 federal UST regulations.

- Participating in task groups regarding 95 RON which the refiners and autos consider as a future fuel to preserve the liquid fuels industry.
- Continuing to lead the way in disaster response efforts by reforming the waiver process, clearing regulatory hurdles, minimizing delays at weigh stations and speeding wait times at water borne terminals.
- Submitting a proposal to the NCWM to require the term "E15" to be included in marketing of E15. Instead of "unleaded 88," need to call it "Unleaded 88 E15."

Through the Energy Marketers of America MDF, marketers have saved roughly \$1.3

billion — that's \$162,500 for each EMA company.

**Tickets are \$25 each
or 5 for \$100.**

Tickets can be purchased with personal or corporate funds by MasterCard, VISA, American Express, cash or check (checks should be made out to the EMA Marketer Defense Fund).
